RAGDOLL

INTRODUCTION

Launched in December 2025, **RAGDOLL** is a Solana-based Web3 project born out of a spirit of fairness, fun, and sustainability. Amidst the proliferation of meme projects that rely on short-term hype, **RAGDOLL** takes a different approach: building a fair ecosystem from the start, transparent on-chain, and with real utility.

Launched through a Fair Launch mechanism without a presale or private sale, **RAGDOLL** ensures that every participant has an equal opportunity. Liquidity is locked, token authority is strictly controlled, and the entire tokenomics structure is designed to be simple and easy to understand for both the community and investors.

More than just a meme token, **RAGDOLL** is developing a casual gaming ecosystem, utility NFTs, and community-driven growth. With light gameplay, unique characters, and a healthy economic mechanism, **RAGDOLL** focuses on a fun and sustainable user experience.

RAGDOLL is not here to chase short-term price spikes, but to create a long-term foundation where the community is at the center of growth, utility drives value, and transparency is the primary standard.

RAGDOLL is not just a token.
RAGDOLL is an ecosystem that is played, used, and developed together.

DISCLAIMER

This whitepaper is provided for informational purposes only and should not be considered as financial, investment, legal, or tax advice. The **RAGDOLL** project is a community-based initiative that does not provide any guarantees or statements regarding future performance, potential profits, or asset value appreciation. No part of this document should be interpreted as a solicitation, invitation, offer, or recommendation to buy or sell tokens, securities, or any financial instruments.

RAGDOLL tokens do not represent ownership, equity, shares, dividend rights, or any form of participation in a company or other legal entity. These tokens do not confer any claims or legal rights against the development team, contributors, or any other related parties. Participation in the Ragdoll ecosystem is voluntary and entirely the responsibility of each individual.

Digital assets, including **RAGDOLL** tokens, carry significant risks such as high volatility, regulatory uncertainty, technological vulnerabilities, cyber security threats, and the potential for total loss of value. Users and holders are required to conduct their own research (DYOR), consult professional advisors if necessary, and understand all risks before participating in the Project.

The development team makes no guarantees or representations, express or implied, regarding the accuracy, timeliness, or completeness of the information in this whitepaper. All features, functions, roadmaps, and plans described may change at any time without notice and are not binding. The Project may evolve, be modified, delayed, or terminated according to the decisions of the contributor team and community governance mechanisms.

By accessing or using any part of the **RAGDOLL** ecosystem, you understand and agree that the development team, contributors, and affiliated parties are not responsible for any direct or indirect losses arising from the use or inability to use the project, including but not limited to financial losses, data loss, or system failures.

This whitepaper may be updated, revised, or replaced at any time. Each reader is responsible for independently keeping up with these changes.

TABLE OF CONTENTS

ABSTRACT

RAGDOLL is a Solana-based Web3 project designed to create a fair, transparent, and sustainable digital ecosystem by combining the power of meme culture, community, and real utility through games and NFTs. This project was born in response to the many meme tokens that failed to maintain long-term value due to unfair distribution, lack of utility, and dependence on short-lived hype.

By adopting a Fair Launch mechanism, **RAGDOLL** was launched without a presale, private sale, or special allocation for insiders. All participants have equal access from day one, while initial liquidity is provided on-chain and locked for a certain period to ensure market stability and build trust. **RAGDOLL's** tokenomics structure is simple and transparent, focusing on the balance between market liquidity, ecosystem development, and long-term operational sustainability.

More than just a speculative asset, the RAGD token serves as the core of the **RAGDOLL** ecosystem. This token is used for various activities, including game access, reward systems, and interactions with NFTs that have functional uses. The RAGDOLL game ecosystem is developed with a casual and non-violent approach, prioritizing fun, accessibility, and broad participation, so that it can reach new Web3 users as well as experienced players.

NFTs in the **RAGDOLL** ecosystem are not only visual collectibles, but also functional components that are directly integrated with gameplay and economic mechanisms. NFT characters are designed to create recurring utility while promoting healthy token circulation within the ecosystem.

From a technical and governance perspective, **RAGDOLL** implements strict on-chain controls, including the deactivation of mint authority and freeze authority, as well as the implementation of a time-based vesting mechanism. This approach aims to minimize inflation risk, increase developer accountability, and ensure that project growth goes hand in hand with utility and community development.

Overall, **RAGDOLL** is positioned as a Web3 project focused on organic growth and long-term sustainability, rather than just a passing trend. By placing the community at the center of the ecosystem, utility as the driver of value, and transparency as a core principle, **RAGDOLL** seeks to build a strong foundation for broader adoption within the Solana ecosystem and Web3 in general.

VISION & MISSION

Vision

Becoming a Solana-based Web3 ecosystem that proves that projects rooted in meme culture can evolve into sustainable, transparent, and utility-oriented digital entertainment infrastructure.

RAGDOLL aims to build an environment where fair launches, on-chain control, and healthy economic mechanisms are the norm, not the exception. By integrating utility tokens, functional NFTs, and casual gaming applications, RAGDOLL positions itself as a platform that can be used, played, and developed sustainably by the global community.

In the long term, RAGDOLL is committed to:

1. Eliminating information asymmetry through on-chain transparency
2. Creating token demand based on activity, not speculation
3. Developing a scalable and easily integrable modular ecosystem
4. Empowering the community as the primary driver of growth and innovation

RAGDOLL's vision is to establish a new standard for community-driven Web3 projects—where value is not solely created by market price, but by the functionality, participation, and sustainability of the ecosystem itself.

MISSION

1. **Promoting the Growth of a Strong and Inclusive**
   Community **RAGDOLL** is committed to creating a safe, friendly, and open space for all community members. This mission includes fostering a culture of mutual support, valuing differences, and providing space for creativity and active participation from every individual without limitations.

2. **Maintaining Transparency and Investor Trust**
   Transparency is the foundation of every step in project development. **RAGDOLL** implements regular updates, open reporting, and publicly verifiable token allocation management. This mission ensures that every holder has clear and accurate information to build long-term trust.

3. **Developing a Sustainable and Valuable Ecosystem**
   RAGDOLL is not just a meme token, but a utility asset with real functions within the ecosystem. Through deflationary mechanisms, token burning, community reward programs, and other digital initiatives, **RAGDOLL** aims to create healthy and sustainable growth.

4. **Combining Entertainment, Culture, and Web3 Technology**
   RAGDOLL leverages the power of meme culture as a form of entertainment as well as a tool to connect global communities.

5. **Empowering the Community Through Open Governance**
   As a community project, **RAGDOLL** sets a development direction that can be influenced by the contributions and voices of holders. This mission includes strengthening governance mechanisms, enabling participation in decision-making, and providing opportunities for the community to build new features.

RAGDOLL TOKEN PHILOSOPHY

RAGDOLL was born from a simple idea: that the greatest strength in the crypto world lies not just in technology or transaction speed, but in a solid, calm, and mutually supportive community. Inspired by the characteristics of the **RAGDOLL** cat, known for being gentle, calm, and full of loyalty, this token was built as a symbol of harmony between creativity, internet culture, and a greater purpose.

In the midst of the bustling, FOMO-driven, and uncertain world of crypto, **RAGDOLL** emerges as a calming space, yet one that still has the power to grow and thrive. Its philosophy is simple: serenity is not slowness, gentleness is not weakness, and a community is not just a number, they are the foundation of an ecosystem that will endure.

1. **Gentle Does Not Mean Weak**
   RAGDOLL rejects the premise that success must always be tough, aggressive, or full of competition. Like the calm yet strong-charactered **RAGDOLL** cat, the **RAGDOLL** token embodies the philosophy that stability and strength can be developed through a consistent, empathetic, and supportive approach.
   We believe that a peaceful yet active community will build a foundation far more enduring than momentary hype.

2. **Community as the Heart of Value**
   In the era of meme tokens, a token's value comes not only from its utility but also from the culture and bonds that are created. **RAGDOLL** upholds the principle that the community is not merely a group of holders, but a digital family built on mutual care, humor, creativity, and the desire to grow together.
   Every community member has a role in shaping the direction of the token-not as followers, but as contributors.

3. **Culture-Driven Utility**
   RAGDOLL is not just an entertainment token, but also a cultural symbol. Memes, art, humor, and community expressions become a "social utility" that encourages engagement and ecosystem expansion.

4. **Transparency and Trust**
   Like the **RAGDOLL** character who always shows itself as it is, this token embodies the value of openness. Without false promises or overambitious roadmaps, **RAGDOLL** follows an honest approach: building step by step, focusing on the community, and always remaining open to developments driven by natural demand.

5. **Soft on the Outside, Strong in the Core**
   The core philosophy of **RAGDOLL** reflects balance: gentle in interactions, relaxed in atmosphere, yet firm in vision. This token is designed to create a positive, friendly, and welcoming experience while maintaining a solid foundation in tokenomics and a clear purpose.

6. **A Symbol of Positive Vibes in Crypto**
   The crypto world is often marked by drama, tension, and turbulence. **RAGDOLL** comes as a symbol of calm, a space to breathe, joke, and build without pressure. Its philosophy is to create a safe and comfortable place for new investors, the web3 community, and meme enthusiasts.

ROADMAP

We call our phases the "Cat Life Cycle".

Phase 1- The Nap

- Social Channel Creation (Telegram, X/Twitter) & Website Launch.
- Initial Marketing Campaign "Wake Up the Cat".
- Token Launch on DEX.

Phase 2 - The Stretch

- Reached 3.000+ Holders.
- Launch of "Ragdoll Staking" Platform.
- Listing on Coin Gecko.
- Listing on Coin Market Cap.

Phase 3 - The Play

- Reached 50,000+ Holders.
- Launch of "Ragdoll Expressions" NFTs.
- Listing on a Tier-3 Centralized Exchange (CEX).

Phase 4 - The Run

- Reached 100,000+ Holders.
- Launch of "Ragdoll Casual Game".
- Listing on a Tier-2 Centralized Exchange (CEX).

Phase 5 – The Thrive

- Reached 500,000+ Holders.
- Governance Exploration.
- Long-term Treasury & Ecosystem Sustainability.

RAGDOLL reserves the right to edit this Whitepaper at any time.

TOKENOMICS

Overview

The token is designed as a Solana based utility asset that supports the community, entertainment, and philanthropy ecosystem. The tokenomics structure is formulated to ensure long-term sustainability, liquidity stability, and transparent distribution for all stakeholders. All allocations and mechanisms are developed to create a balance between community growth, ecosystem expansion, and investor security.

Token Specifications

| BLOCKCHAIN SOLANA	TOTAL SUPPLY 1 BILLION
DECIMALS 9	TOKEN NAME RAGDOLL
TOKEN SYMBOL $RAGD	CONTRACT ADDRESS 5rvgkFkx9FKHP82aKs9abBwrTguZiSuldJG6EN5TLkr8

Token Allocations

The token distribution is designed to support organic growth while maintaining investor confidence. Here is the official distribution structure:

Allocation Percentage Amount Description

TOKENOMICS $RAGD

Total Supply
1.000.000.000

Community Incentives : 10 %

Ecosystem & Growth : 20 %

Market & Liquidity Pool : 70 %

Allocation	Percentage	Amount	Description
Market & Liquidity Pool	**70 %**	**700.000.000**	**Allocated for initial liquidity and public circulation. An initial liquidity pool of 200,000,000 RAGD is used on Raydium, with liquidity provider (LP) tokens securely locked.**
- Initial Liquidity Pool	20 %	200.000.000	
- Liquidity Expansion Reserve	50 %	500.000.000	
			The remaining 500,000,000 RAGD is reserved exclusively for future liquidity expansion, fully locked and released through a 6-month vesting schedule over 30 months.
Ecosystem & Growth	**20 %**	**200.000.000**	**Allocated for ecosystem development and long-term project growth. This allocation supports operational sustainability, strategic partnerships, and future expansion initiatives. All tokens in this category are fully locked and gradually released under a predetermined vesting mechanism, ensuring controlled supply release and minimizing market impact.**
- Treasury	7 %	70.000.000	
- Marketing & Partnerships	8 %	80.000.000	
- Strategic Reserve	5 %	50.000.000	
			A total of 200,000,000 RAGD are fully locked and released through a 3-month vesting schedule over 30 months.
Community Incentives	**10 %**	**100.000.000**	**Allocated for community incentives to reward participation and encourage long-term engagement. This allocation includes staking rewards and community events.**
- Staking	8 %	80.000.000	
- Community Events	2 %	20.000.000	
			A total of 80,000,000 RAGD tokens are subject to a 6-month lock-up period.
Team Allocation	**0 %**	**0**	**There is no team allocation to maintain a community-first model and build investor trust from the start.**

To maintain transparency, uphold our community-first model, and strengthen investor trust, we are providing the wallet address that holds this allocation:

Allocation	Wallet Address
Market & Liquidity Pool	3FNWAJnZtzEda69gz3gleu56KU3zpCXNBswqNJjApyPM
Ecosystem & Growth	5ZJDoiLjSsHMEWd3uXhGRY58vLDBgJX3D4tfCBSi4paf
Community Incentives	HoGbLYQncwLx5xMBWkbdsG6fzBuwjhk7NDauP78WpAjP

TEAM OVERVIEW

We are a team of ordinary individuals who started with curiosity and passion, not privilege. RAGDOLL was born from a genuine desire to learn, build, and grow within the blockchain space. None of us came from big institutions or established crypto companies we came from real life, real challenges, and a strong belief in decentralization and community-driven innovation. Through continuous learning, collaboration, and hands-on experience in the Solana ecosystem, we are committed to evolving step by step. Our focus is not short-term hype, but long-term growth, transparency, and creating value together with our community.

We believe blockchain is not only for experts or elites it is a space where anyone willing to learn and contribute can grow.

RAGD.Dev
Bio: RAGD Dev comes from a non-elite background, starting the blockchain journey through self-learning, experimentation, and real-world practice. With a strong interest in decentralization and the Solana ecosystem, RAGD Dev focuses on building secure, efficient smart contracts and continuously improving through hands-on development.
Focus: SPL Token · Smart Contracts · On-chain Security

RAGD.Engineer
Bio: RAGD Engineer began as an ordinary individual driven by curiosity and determination to understand how blockchain works beyond the surface. Through consistent learning and problem-solving, RAGD Engineer contributes to system architecture, integrations, and technical optimization within the RAGDOLL ecosystem.
Focus: Infrastructure· System Optimization· Solana Tooling

RAGD.Builder
Bio: RAGD Builder represents the spirit of building from the ground up. Coming from a non-technical or mixed background, RAGD Builder bridges ideas into execution by supporting product development, community tools, and ecosystem growth through continuous learning and collaboration.
Focus: Product Development · Ecosystem Growth · Community Tools

RAGDOLL TEAM
The RAGDOLL team is composed of contributors from ordinary backgrounds who chose to grow through learning, experimentation, and community collaboration.
Some contributors remain pseudonymous for privacy reasons.
